

Jaxxon Concrete pumps recognise and embrace the concept that occupational Health and safety is an essential part of our business operation.

We are registered and compliant members of **SITE SAFE** New Zealand.

Our staff are actively encouraged to be engaged in our H&S policy procedures and all are suitably **trained and qualified**.

All Pump Operators hold current **Site Safe Building Construction Passports** and are familiar with the concept under the Health and Safety Works Act 2015 (HSWA) that everyone is responsible for Health and safety in the workplace.

Our Pump Operators conduct daily pre-start vehicle safety checks and job allocated **Site Specific Safety Plans**.

All Pump Operators are aware that they must comply with any specific induction, site instruction or **environmental policy** that individual clients may deem appropriate for different sites.

In addition our fleet mechanic maintains ongoing mechanical and maintenance procedures to ensure all equipment is currently fit for purpose.

Our **Health and Safety Policy** together with our procedures and processes comply with our company obligations under the Health and Safety at Work Act which came into effect on 04 April 2016.

Please CONTACT US at admin@jaxxonconcretepumps.co.nz for current copies of our Health and Safety Policy or other documentation required for pre-qualification as a preferred sub-contractor on your projects.
